

Frontiers in TNBC: Bridging Early Detection and Next-Generation Therapeutics

July 19th, 2026

The David Lopatie Conference Centre
Weizmann Institute of Science

This workshop focuses on early detection and emerging therapeutic strategies for triple-negative breast cancer (TNBC), an aggressive and clinically challenging subtype of breast cancer. It will highlight current clinical challenges alongside recent scientific and technological advances aimed at improving early diagnosis and promoting the development of highly effective, personalized therapies. The workshop will bring together oncologists from leading medical centers in Israel and abroad as well as distinguished scientists, to foster interdisciplinary dialogue and collaboration.

Speakers

- Rami Aqeilan** The Hebrew University of Jerusalem, Israel
- Manfred Claassen** University Hospital Tübingen, Germany
- Albert Grinshpun** Shaare Zedek Medical Center, Israel
- Sima Lev** Weizmann Institute of Science, Israel
- Rinat Molcho Bernshtein** Sheba Hospital, Israel
- Ruth Oratz** NYU, NY, USA
- Tamar Peretz** Hadassah Medical Center, Israel
- Shani Paluch-Shimon** Hadassah Medical Center, Israel
- Ronit Satchi-Fainaro** Tel-Aviv University, Israel
- Eran Segal** Weizmann Institute of Science, Israel
- Christos Sotiriou** Université Libre de Bruxelles, Belgium
