CBRC 3rd Virtual Seminar
40th Anniversary of the CBRC
November 18th, 2020
16:00-18:00

Speakers

Prof. Isaac Witz
Prof. Gidi Rechavi
Prof. Sara Lavi

Prof. Nadir Arber

Short talks

Chani Stossel
(Talia Golan Lab)
Dan Coster
(Ron Shamir Lab)
Sigal Avraham
(Ebenstein Lab)
Anabel Eckerling
(Ben-Eliyahu Lab)

Registration zoom link:

**Session I**

16:00-16:20 | Isaac Witz
“A cross talk between biologists and physicians is supposed to facilitate the comprehension of (for example) the cross talk between tumors and their microenvironment”

16:25-16:30 | Chani Stossel (Talia Golan Lab)
“Susceptibility of BRCA associated PDAC to immunotherapy”

16:30-16:50 | Nadir Arber
“The Janus faces of CD24”

16:50-16:55 | Dan Coster (Ron Shamir Lab)
“Early detection of cancer based on EMR data - a modern screening approach”

16:50-17:00 | Q&A

**Session II**

17:00-17:05 | Sigal Avraham (Ebenstein Lab)
“Rapid quantification of 5mC and 5hmC on multi-sample array slides”

17:05-17:25 | Sara Lavi
“PPM1A, the protein phosphatase that governs homeostasis”

17:25-17:30 | Anabel Eckerling (Ben Eliyahu Lab)
“Elimination of primary tumor secreted factors induces regression of spontaneous micro-metastases: Regulation by stress-inflammatory responses and potential clinical ramifications”

17:30-17:50 | Gidi Rechavi
“Therapeutic implications of epitranscriptomic research”

17:50-18:00 | Q&A
