

Dear colleagues,

27 April 2022

Thanks for your participation in the joint **kickoff meeting** of CDST joint program which will take place on **Friday 29 April** at [The Steinhardt Museum of Natural History, TAU](#).

The meeting will start with brief introductions by the directors of the four centers collaborating in this program, followed by a lecture presented by Prof. Eytan Ruppín from the Center for Cancer Research NIH. After a short break, we will have two sessions of topical round tables. **Discussion leaders** will coordinate each topic. Please find below the meeting schedule and an updated partition of participants into tables.

Discussion leaders are marked in **YELLOW** in the table below. Round table discussions will be in Hebrew but switch to English if requested by one of the participants.

### **Action items:**

→ **Discussion leaders**, you would need to conduct an effective discussion and monitor time carefully, allowing all PIs to speak within the time limit (50 minutes for up to 12 PIs). See below.

→ **All PIs: please plan.** You will have **four minutes** to cover the following:

- 30 Seconds to introduce yourself
- What do you work on?
- Can you think of a collaboration with someone at the table?

There will be no slides or visual aids. Please prepare what you plan to say carefully. Discussion leaders will be very punctual.

For lack of time, students will not be invited to speak in the round tables.

### **The meeting schedule:**

- 8:45-9:15 Coffee and gathering
- 9:15-9:30 Opening – Prof. Ronit Satchi-Fainaro CBRC, Prof. Meir Feder TAD, Prof. Noam Shomron Djerassi Institute & Prof. Elhanan Borenstein, E. J. Safra Center.
- 9:30-10:10 Lecture - Prof. Eytan Ruppín – “*Bulk and single cell transcriptomics-based precision oncology*”
- 10:10-10:25 Break
- 10:25-11:15 Session 1
- 11:15-11:45 Coffee break and networking
- 11:45-12:35 Session 2
- 12:35-12:45 Summary and closing – Prof. Ronit Satchi-Fainaro

See roundtable assignments on the next page.

See you at the meeting,

## Roundtable assignment

PIs/scientists were assigned to two of their requested topics.

In each table, there are no more than 12 participants in order to allow each to present, and there is a mix of clinicians and basic scientists from the relevant disciplines. It is therefore important to adhere to your assigned table in each session.
